

Annual Electric Marketer Meeting

We want to thank you again for attending the 2022 Annual Electric Marketer Meeting. Please see attached the meeting presentation.

We are currently compiling all the questions and answers from our Electric Marketer Meeting and will be creating a document that will be sent out in the upcoming newsletter.

Thank you,

Retail Choice Operations

Consolidated Edison Company of New York, Inc.

Electric Marketer Meeting

November 21, 2022

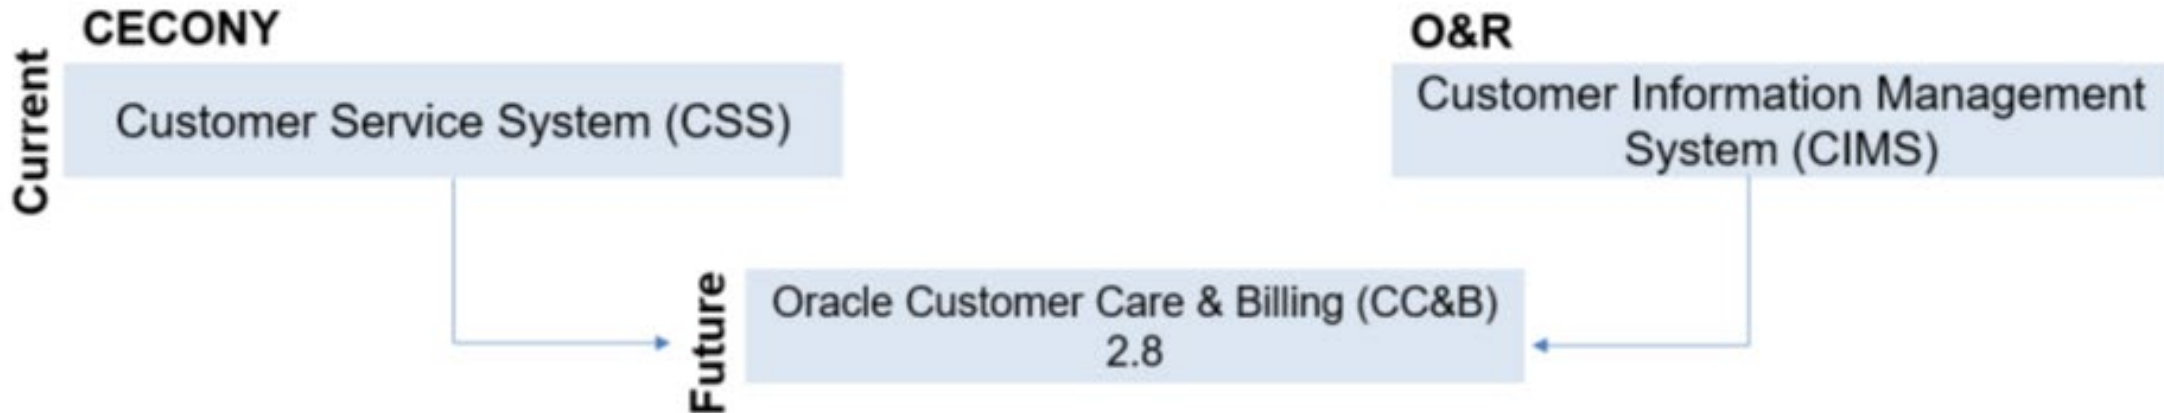

Agenda

- Corporate Updates
- Account Billing
- Retail Access Information System (RAIS)
- Electronic Data Interchange (EDI)
- Meter Reading Schedule for 2023
- Reminders and Available Resources
- Q&A

Corporate Updates

Customer Information System Replacement Project

The **CECONY Customer Service System (CSS)** and the **O&R Customer Information Management System (CIMS)** currently support customer account, credit, collections and meter to bill functions. Both legacy platforms will be replaced with **Oracle Customer Care and Billing (CC&B)** as part of the CORE project.

CORE Project - Timeline

We have started our internal testing. Once we have completed enough testing, we will start our external testing with the companies that requested to test with us.

CORE Project Changes - Account Numbers

Account Number Changes

- Account number's will be 11 digits for both Customers and ESCO Account Number.
- The new account number will be used for all EDI communications which will be displayed on the customer's bill and used for enrolling with ESCO's.

ESCO Account Number

- Account number will be communicated thru email to respective marketers during cut-over period. This spreadsheet will be sent after the customer account number change (814C) transactions has been sent out.

| ESCO Legacy Shell Account number | CC&B Shell Account Number | Effective Date |
|----------------------------------|---------------------------|----------------|
| 999001000100006 | 65133400005 | 10/13/2021 |
| 9999499900 | 65144400002 | 10/13/2021 |

CORE Project Changes - Account Numbers

Customer Account Number

- During the cut over period an 814C transaction will be sent for the customer account number change from legacy to the CC&B account number.
- 814C customer account number change transaction (sample below) will be sent. In this transaction, it will have ESCO shell account number still pointing to old (legacy one), other segments will remain same.

```
CECONY LIN*99999999-1*SH*EL*SH*CE~  
ASI*7*001~  
REF*TD*REF12~  
REF*12*111111111111~  
REF*45*9999999999999999~  
REF*AJ*9999999999999996~  
DTM*007*20210116~
```

Cutover Period - Account Number Changes

90 Day Grace Period

- A 90-day grace period will be given to all ESCO EDI transactions to use the legacy customer account number and ESCO account number.

After the 90-day grace period

- Any transaction received through EDI on legacy customer account numbers will be rejected back to ESCOs. This also applies to the ESCO shell account number.

Exceptions

- This 90-day period is not applicable for any external facing websites (RAIS websites).
- Any ESCO interactions with external facing websites has to use new account numbers.

CORE Project Changes - Service Address Reformatting

- We will be standardizing the service address based on US Postal Service guidelines. As a result, impacted supplier enrolled accounts will trigger an 814C change transaction.
- 814C transactions will be sent with the modified customer address as shown below. Other segments on transaction will remain same.

```
BGN*13*123456789_1234567*20230605~  
N1*SJ*ESCO NAME*1*999999999~

REF*TD*N18R~  
REF*12*999999999999~  
REF*AJ*111111111111~
```

CORE Project Changes - Customer Name Reformatting

- Customer name fields in the database are structured differently than the current legacy systems. As a result, when the customer's names are converted to new CC&B database, impacted supplier enrolled accounts will trigger an 814C change transaction.
- 814C transactions will be sent with the modified customer name as shown below. Other segments on transaction will remain same.

```
BGN*13*123456789_1234567*20230605~

DTM*007*20230531~
```

CORE Project Updates

Drop Transactions

- Will be sent with reason code of “020” - “ACCOUNT CLOSED”.

Changes to Account Numbers (ATRA) Process

- Changes in meter reading routes will no longer result in changes to the Account Numbers.
- ESCO's will not receive any 814C for account changes due to ATRA.

All CORE Project Newsletters can be found on the ESCO Website

Smart Meter (AMI) Saturation

- Estimated 97.5% of the meter deployment will be completed by end of 2022.
- Completed 96% mass deployment which equates to 5.12M meters installed
 - Electric meters installed - 3.95M
 - Gas meters installed - 1.17M
- Communications performance continues to improve and is now at 99.8% across service territory
- In the PSC reporting plan for 2016, it was established to maintain estimated reads below 1.5% metric
 - AMI Estimated billing rate trending at 0.68% for October

Account Billing

Reasons for Unbilled Accounts

Defective Meters

Improper postings of Meter Information

Meter Exchanges

- Delays in updating
- Transitioning from Legacy to AMI or Smart Meter

Estimated Readings

- Long Term no Access
- Weather
- Pandemic restrictions

Corrective Action

Notification is sent to the corresponding billing group to adjust the account

Billing Groups: Customer Assistance or the Direct Representative

If the account has a billing discrepancy where Retail Choice involvement is needed:

When an entity is missing the customer's first or last months customer bill, usually this is an indicator that the account did not transition properly

Unbilled Process

All Retail Choice accounts are proactively reviewed

Accounts that receive an inquiry from an ESCO are further reviewed

Confirm it is over 30 days unbilled
Confirm it has an open referral

CORE/AMI Project - Billing

Bulk billing should decrease

Bill cycles expected not to exceed more than 1 month

AMI meter deployment

Reduces the probably of estimated bill that creates billing adjustments

Available Resources on RAIS

Daily Account Listing File

These files contain the list of a marketer's Active, Inactive and Pending accounts (within the last 60 days):

- Hourly metered data is required to be submitted to the NYISO on a monthly basis.
- Hourly metered data is calculated based on a loadshaping methodology as well as interval meter readings obtained from AMI and legacy meters.

NYISO Reported Data

(ICAP Trueup Report)

The ICAP true-up report will indicate true-up factors based on the ICAP reports submitted to the NYISO (Estimated Load, Loadshift, True-up). These values are used to calculate an ESCO's ICAP responsibility in MW.

| MARKET | ZONE | REPORT DATE | TRUEUP FACTOR | REPORT TYPE |
|------------|------|-------------|---------------|---|
| TD (H-I-J) | H | 03/01/2022 | 0.167225482 | Forecast Trueup Factor (Estimated Load) |

The loadshape file includes all load shapes assigned based on the service class, stratum, day type, and temperature variable.

These loadshapes can be used to calculate an accounts hourly meter data.

Electronic Data Interchange (EDI)

Missing 814 Response

What Information Should The Email Contain

If you have met all the requirements from the previous slide, please feel free to email us at

Retailaccess@coned.com

You will need to include the following:

- Account Number
- Type of 814
- Service (Electric)
- Date the file was sent
- ISA#

What Occurs After Your Email Is Received

Spot check the provided account(s)

Review EDI

- **Inbound file**

If inbound file is not found, we will advise to review/update the list

- **Outbound file**

If outbound file is found, we will advise to review/update the list

We look to see that some of the accounts are valid customer accounts

Is the Account number a valid CECONY account number?

Once the above has been reviewed, we will then reach out to IT with the sample accounts which did not create responses

Missing 867MU Files

867 MU file may be missing due to:

- A system error
- Account has not been billed to date

Please reference our RAIS website to determine if the account has been billed up to date

The screenshot shows the 'conEdison Retail Choice' interface. At the top, there are navigation links for Alerts, Downloads, Billing, Capacity & Energy, Admin, and a Log Out button. Below the navigation is a breadcrumb trail: Home / Billing / Bill History. The main heading is 'Bill History'. The page is divided into three main sections: Account Details, Meter Numbers, and Meter Readings.

| Account Details | | Meter Numbers | Meter Readings | | | | | | |

Missing 867 - Review RAIS

If the account has a bill up to date in RAIS

Please reach out to us at retailaccess@coned.com

If the account does not have a current bill in RAIS

In most cases the customer should be aware through their monthly bill, as this is indicated in our message center.

The customer should reach out to Customer Service to escalate their billing.

Meter Reading Schedule

2023

Meter Reading Schedule

Months with two possible meter reading trip dates:

April
October
December

Reminder:

Electronic data interchange (EDI) transactions must be received by 4:30PM EST to meet the deadline dates.
