

CECONY resending 867s due to missing PTD segments

The 867MUs sent on Oct-11, Oct-13 and Oct-18 were missing the PTD BQ (meter detail) and PTDPM (Interval usage) EDI segments. We have fixed this issue and will be resending the revised 867MUs.

ESCOs who had earlier received the correct 867MUs (with meter detail and interval usage EDI segments populated) on any of the above dates will receive a duplicate 867MU. Please ignore them.

ESCOs who had earlier received the incorrect 867MUs (without meter detail and interval usage EDI segments populated) on any of the above dates will receive the correct 867MU (with meter detail and interval usage EDI segments populated). We request you to process the correct 867MU.

Thank you,
