NOTICE OF CON EDISON'S REMEDIAL PRE-DESIGN INVESTIGATION WORK AT MANHATTAN CENTER FOR SCIENCE AND MATHEMATICS FROM:

Monday, July 30 to

Friday, August 24th, 2012

Manhattan Center for Science and Mathematics was formerly the E.115th Street Manufactured Gas Plant (MGP) site located between Pleasant Avenue and FDR Drive. A site remedy was approved by the NYSDEC to address MGP contamination in sub-surface soils. Con Edison is now in the design phase for the approved remedy.

This summer, Con Edison will be conducting a supplemental investigation in the back yard of the school. This work will include advancing soil borings, installation of monitoring wells and excavating test pits. The information obtained from these activities, along with information from previous investigations, will be used to support the on-going design of the sub-surface barrier wall that is planned along the perimeter fence which borders the FDR.

If you have any questions about these activities or Con Edison's program to address former manufactured gas plant sites, please call Con Edison at 877-602-6633. You can also call the New York State Department of Environmental Conservation Project Manager Liz Lukowski at 518-402-9564 or the New York State Department of Health Project Manager Dawn Hettrick at 518-402-7880.
