8-12 Washington Avenue – Hastings on Hudson MGP Site

Remediation Project – Soil Excavation

Friday, February 16, 2018

As part of the manufactured gas plant (MGP) remediation program, Con Edison will be excavating and replacing two feet of soil at 10-12 Washington Ave. This property is located on the site of the former Hastings MGP, which operated from 1867-1902. Prior investigations at this location show limited MGP impacts and the New York State Department of Environmental Conservation (NYSDEC) has determined that the shallow soil should be removed and a clean cover installed. Work procedures approved by the NYSDEC and the New York State Department of Health, including a community air monitoring plan, will be put in place, and there is not expected to be any health impact to the local community.

We will be working from February 22th thru March 16th 2018.

On 10-12 Washington Avenue between Warburton Avenue & Southside Avenue.

- Weekdays 7:30am-5pm

Community Impacts:

- Parking restrictions on eleven parking spots on Ridge Street during construction
- Potential noise from a vacuum truck
- Workers wearing protective gear

We apologize for any inconvenience this work may cause.

For more information or to receive updates on this project, please visit conedison.com/mgp or contact Westchester Regional & Community Affairs at 1-877-602-6633, or e-mail us at WALSHB@coned.com.
