

Con Edison Demand Response Programs
Commercial System Relief Program (21 Hour Notification Program)

Event Call Windows for 2026

Customers participating in CSRP will be asked to reduce their energy use during a four-hour long call window period. Each network falls within one of four fixed call windows: 11:00 AM - 3:00 PM, 2:00 PM - 6:00 PM, 4:00 PM - 8:00 PM, and 7:00 PM - 11:00 PM. Advisory notice of a CSRP event will be provided at least 21 hours in advance and confirmed or canceled at least two hours before the start time of an event.

Table 1 lists Con Edison networks by demand response event call window. Table 2 lists the same information by borough.

Please note that several networks have new call window assignments for 2026. These changes were made to better align the call windows with the observed peak load. Please take note of these changes for the 2026 season and ensure that all participants and stakeholders are aware of their newly assigned call windows.

Network boundaries are typically different from neighborhood borders. For example, the Richmond Hill network includes parts of Brooklyn and Queens. Current Aggregators and Direct Enroll customers should use the Network Lookup tool in the DR/SUR Portal to confirm the assigned network and call window. If you have further questions, please email the Con Edison Demand Response team at demandresponse@coned.com

**Commercial System Relief Program (21 Hour Notification Program)
Event Call Windows for 2026**

For the 2026 DR season, 32 networks have moved to new call windows to better align with their respective peak loads. In addition, the Morgan network created in 2025 has been added to the list. Please note these changes in Tables 3 and 4 below.

Table 3: Networks with New Call Windows in 2026 versus 2025			
Borough	Network	2025 Call Window	2026 Call Window

- 7 p.m. - 11 p.m. (19:00 - 23:00)

Notes: All boundaries are approximate

**Con Edison Demand Response Programs
Distribution Load Relief Program (2 Hour or Less Notification Program)**

List of Tier 2 Networks for 2026

Customers participating in DLRP will be asked to reduce their energy use when there is a contingency affecting their specific area of Con Edison’s electric system. Notice will be provided two hours or less before the demand response event start time. Electrical networks are separated into two tiers - Tier 1 and 2. Tier 2 networks are considered a higher priority for demand response and are paid at a higher incentive rate than the accounts in Tier 1 networks.

Any network not listed as Tier 2 is categorized as Tier 1.

For the 2026 DR season, two new networks will now be categorized as a Tier 2 networks (Borough Hall and Ocean Parkway). Two networks will revert to Tier 1 classification (Northeast Bronx and West Bronx). These changes were made in accordance with the revised evaluation criteria, as ordered by the PSC as part of filing 17-E-0741, to align the Tier 2 networks with those in most need of contingency load relief.

Network boundaries are typically different from neighborhood borders. For example, the Richmond Hill network includes parts of Brooklyn and Queens. Current Aggregators and Direct Enroll customers should use the Network Lookup tool in the DR/SUR Portal to confirm the assigned network and DLRP tier. If you have further questions, email Con Edison’s Demand Response team at demandresponse@coned.com
